My name is Victor Foster.

These are the events that occurred after I abandoned my previous name, Frankenstein.

20 years ago.

I was a promising surgeon in
one of this city's biggest hospitals.

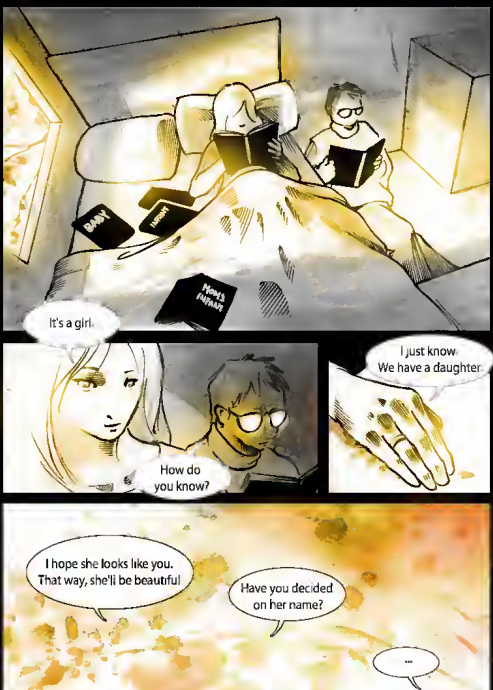
My graduate thesis on
<Minimizing Organ Transplant Rejective Behavior Research>
instantly made me a star in the medical community.

I was acknowledged by my colleagues
and respected by my patients.

I couldn't ask for more.

However, there was
something more important in my life.

Elizabeth.
I met her during an internship for medical school. She was so charismatic that it was impossible to not fall for her.
We quickly fell in love and got married once we became doctors.



It's a girl.
How do you know?
I just know. We have a daughter.
I hope she looks like you. That way, she'll be beautiful
Have you decided on her name?
...

Every day was bliss.

However, it was short-lived.

To be continued...
